Nature Photography Feb - May 2010

Nature Photography Workshop

Saturday, April 24, May 1 and May 8, 2010, Noon - 4 p.m.

Like being outdoors? Like taking pictures? Combine the two in David Saxe's successful series of nature photography classes. Nature photography encompasses a wide range of venues, subjects and purposes. This workshop mixes instruction with practical field experience, introducing aspects of nature photography including composition, exposure, focusing, lighting, camera operation and field techniques. Examples of topics covered include: nature photography venues and examples, composition techniques, tools for composition, natural and modified lighting, controlling exposure, focusing methods, depth of field, camera equipment and operation, polarizing filter use, field equipment, practical tips for the field, and projects for the beginner. Throughout, application of these techniques to nature photography is highlighted. Field exercises augment the classroom instruction and permit the students to practice the techniques they have learned. Please have your camera make and model available when you register, and be prepared to go outside. Visit www.usaaloft.com/audubon for more details. Leader: David Saxe, USA Aloft, LLC. Cost: \$90 M / \$120 NM for the whole series.

Painting with Light: Nature Photography at Night

Friday, May 14, 2010 7:00 PM - 10:00 PM

Rain Date May 15

In this workshop we will explore the use of light to illuminate night-time subjects. Creative use of illumination, coupled with long exposure times, can be employed both to take night time pictures of natural surroundings and to create stunning artistic views of the world. We will discuss techniques inside and then as darkness provides our palette, we will move outside to experiment with various lighting scenarios.

The workshop is intended for intermediate to advanced photographers. You will learn more if your camera is capable of setting aperture and/or shutter speed, has a time exposure setting and supports a flash attachment. Remote shutter device (bulb or wireless) is highly recommended to avoid camera shake. Not all point and shoot cameras support these modes. Digital cameras are strongly preferred. Please have your camera make and model and preferred lens specifications available when you register. Bring a tripod. Leader: David Saxe, USA Aloft, LLC Cost: \$30 Members/ \$40 Non Members
